

Garden Report

I have been looking at the gardens around the school grounds. Each class has done something for Stone in Bloom. Read on to find out what they have done...

Reception has some lush lavender, which smells lovely, in a shaded planter bench. There is another plant that smells lovely, it is called rosemary. Honeysuckle climbs up and over the benches. The shed makes everyone happy because there are jolly pictures of minibeasts painted on it.

Year 1/2 have created a boat theme it makes you feel that you are in water. Rosie is the name painted on the side of the barge. Rosie and Jim are canal barge characters. Their names have been painted on a pot. Rope has been twisted around the pots also flags are hanging down by the boat to make an effective display.

Year 3/4 have been growing seedlings in grow-bags. It makes the children proud to see their achievements and results. Some of the lush flourishing plants have started to flower now so that is good news.

The garden has some pumpkins that have been grown by year 2. It reminds me of Halloween.

Next year we will try to grow wild flowers. We can't grow them at the moment. We have put down a black sheet of plastic to kill the grass ready for planting the seeds next spring.

The flowers around the obelisks are starting to bloom now. Blooming blossom bunches are climbing around the pergola. Blossoming flowers grow in a patch in the lawn.

The garden is relaxing, people enjoy being there, and we have enjoyed working hard to make it beautiful. We will look after the gardens.
